Personal Profile

- I am an IT professional enthusiastic about technology currently working as software developer who with JavaScript technologies like react and NodeJS. I am excited about the front end process from gathering requirements, developing user-flows, wireframes to building UIs. Am always open to working with new technologies.
- I am always open to exploring new technologies and take on new challenges which can help me grow to be a full stack developer.
- Being attentive to detail helps in gathering data for solving problems.
- I hold integrity to a high degree as it is one of the back bones of any organisation.
- Comfortable working in a team or working with little supervision.

Projects I have been a part of (Portfolio)

- imukaaccess.com. A tech start up trying to connect tech entrepreneurs to investors. Building api functions to summarise entrepreneur business plans into digital pitch decks which can be accessed by investors using code igniter.
- Ahindi mobile app. This is a mobile application providing safety tracking for export labor. Duties involved converting wireframes into usable user interfaces to be tested by users. Fixing bugs.

Skills

- Design and wire framing with sigma Figma
- Fontend technologies: JavaScript, react, Gatsby, CSS, HTML,
- Nodejs with express framework
- Php with codeigniter and Laravel
- Router and switch configurations in computer networking
- Hardware maintenance and software installations
- Knowledge of MS office package
